

# E-BIKES, SCOOTERS & SKATEBOARDS

## What to Know

### CLASS 1

Class 1 e-bikes provide pedal assist only, meaning the motor only kicks in when you pedal, and shuts off at 20 mph.

### CLASS 2

Class 2 e-bikes have both pedal assist and a throttle, which means they can run without pedaling – but still max out at 20 mph.

### CLASS 3

Class 3 e-bikes only use pedal assist but go up to 28 mph. They are often treated like mopeds and may require registration, insurance, and a license if you're under 17.

**Watts** measure electric motor power. 750 watts equals about 1 horsepower.

If your e-bike exceeds **750 watts**, **50cc**, or **20 mph** on flat ground, it's considered a motorized bicycle and must be registered, insured, and may require a moped license if you're under 18.

Vehicles without pedals are no longer considered bikes and must also be registered and insured.

### E-SCOOTERS & SKATEBOARDS

**E-scooters** can go up to 19 mph and don't require registration, but riders under 17 must wear a helmet. They're allowed on roads and bike lanes, but sidewalk use varies by town. **E-skateboards** are limited to 10 mph, for ages 16 and up, and must stay off sidewalks.

Wear your helmet, follow traffic laws, and ride responsibly. For more information, visit [nj.gov/mvc](http://nj.gov/mvc) or contact the Middletown Township Police Department at 732-615-2100.
