Re: Appraisal Report
Market Value Estimate
Potential Full Taking
Block 1045, Lots 2, 3 and 4
1114 West Nut Swamp Road
Middletown Township, Monmouth County, New Jersey
gCo File No. 2023-046-01

Dear Mr. Nelson:

Pursuant to your request for appraisal services, we inspected the above-referenced property on February 24, 2023, on May 10, 2023 and again on November 3, 2023, to estimate the fee simple market value of the subject as of that date.

The subject of this report is three lots totaling 18.71± acres of vacant land situated on the north side of West Nut Swamp Road between the Garden State Parkway and Crawfords Corner - Everett Road in Middletown, New Jersey. The parcels are more particularly known as Block 1045, Lots 2, 3 and 4 in the Township of Middletown, Monmouth County, New Jersey. The subject is located in the R-45, Low Density, Single-Family Residence zone and permits residential development. The Highest and Best Use was determined to be a four-lot residential subdivision with five open space or stormwater management lots per a Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023. The purpose of this appraisal is to estimate the fee simple market value for a potential full acquisition.

Based on the analysis and conclusions contained in this appraisal report, we estimate the fee simple market value of the subject as of November 3, 2023, to be:

SEVEN HUNDRED SIXTY THOUSAND DOLLARS

\$760,000

Middletown Township
c/o Mr. Brian M. Nelson, Esq.
Spiro Harrison & Nelson, LLC

This value estimate is subject to the various conditions and comments contained in this report.

Respectfully submitted,

Robert Gagliano, MAI, CRE
President

EXECUTIVE SUMMARY

Type of Property:	Vacant Land
Location:	1114 West Nut Swamp Road Block 1045, Lots 2, 3 and 4 Township of Middletown, Monmouth County, New Jersey
Site:	18.71± acres or 815,152 square feet
Estate Appraised:	Fee Simple
Purpose of the Appraisal:	To estimate the fee simple market value of the subject for a potential full acquisition.
Zoning:	R45, Low Density, Single-Family Residence zone
Highest and Best Use:	Four-lot residential subdivision with five open space or stormwater management lots, per a Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023

Value Indications

Sales Comparison Approach: \$760,000

Final Value Conclusion: \$760,000

Date of Value: November 3, 2023

Date of Report: December 5, 2023

SCOPE OF WORK

Description of the Subject Property

The subject of this report is three lots totaling 18.71± acres of vacant land situated on the north side of West Nut Swamp Road between the Garden State Parkway and Crawfords Corner - Everett Road in Middletown, New Jersey. The parcels are more particularly known as Block 1045, Lots 2, 3 and 4 in the Township of Middletown, Monmouth County, New Jersey. The subject is located in the R-45, Low Density, Single-Family Residence zone and permits residential development. The Highest and Best Use was determined to be a four-lot residential subdivision with five open space or stormwater management lots per a Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023.

Client and Intended Users

This appraisal report is prepared for use by the client, Middletown Township c/o Mr. Brian M. Nelson, Esq.

Use of the Appraisal

This appraisal report is to be used by the client for a potential full acquisition. The appraisal shall be used for no other purpose without the consent of the appraiser.

Type of Opinion

Market Value.

Estate Appraised

Fee Simple.

Date of Value

The date of value is November 3, 2023.

Date of Report

The date of the report is December 5, 2023.

Extraordinary Assumptions and Hypothetical Conditions

This appraisal does not include any extraordinary assumptions or hypothetical conditions.

Appraisal Development

To prepare this market value appraisal, the appraiser inspected the property on February 16, 2023, on May 10, 2023 and again on November 3, 2023.

An inspection of the subject property was performed. Although due diligence was exercised, the appraiser is not an expert in such matters as soils, structural engineering, hazardous waste, environmental impairments, etc., and no warranty is given as to these elements. As needed, inspections by professionals within these fields are recommended, and the final estimate of value is subject to their findings.

All three approaches to value were considered. The Sales Comparison Approach is considered the most applicable approach and is developed in this report.

In the Sales Comparison Approach, data gathered on sales of small subdivisions in the subject market area was analyzed to develop a market value estimate via the Sales Comparison Approach.

All of the assembled data was confirmed with a party to the transaction or their legal representatives. If personal confirmation was not possible, the source of the confirmation is disclosed, and we draw a conclusion regarding the relevance and reliability of the transaction.

This appraisal report was prepared in conformity with the Code of Professional Ethics and the Standards of Professional Appraisal Practice of the Appraisal Institute, which include the Uniform Standards of Professional Appraisal Practice (“USPAP”) and the appraiser considered all available, relevant market data.

Data sources relied upon include but are not limited to local and state public records; Multiple Listing Services; real estate data services such as CoStar, LoopNet, NJ Property Records, Ordinance.com, Marshall and Swift, RERC, PriceWaterhouseCoopers, RealtyRates, ACLI, IREM and others; discussions with real estate professionals active in the subject market area, including brokers, agents, property managers, property owners, developers and appraisers.

Demographic and other data has been obtained from the Site to Do Business/ESRI, the United States Department of Commerce, Bureau of the Census, the State of New Jersey, Department of Labor and Department of Community Affairs, the Monmouth County Department of Planning and Office of Economic Development and the Township of Middletown.

Appraisal Report

Effective January 1, 2014, the Appraisal Standards Board revised the Uniform Standards of Professional Appraisal Practice to reflect two report options: Appraisal Report and Restricted Appraisal Report. The essential difference among these options is the content and level of information provided. The appropriate reporting option and the level of information necessary in the report are dependent on the intended use and the intended users.

An *Appraisal Report* may have the client as the only intended user but may also have other intended users; specified parts of the research and development must be summarized; must summarize information analyzed and reasoning that supports analyses, opinions and conclusion.

A *Restricted Appraisal Report* must have the client as the only intended user. Research and development need only be stated. A restricted appraisal must include a prominent use restriction that limits the use of the report to the client and warns that the rationale for how opinions and conclusions set forth were arrived at may not be properly understood without additional information.

This property valuation was prepared in accordance with the requirements of the *Appraisal Report* option of USPAP Standards.

Competency Statement

The appraiser is familiar with the subject market and the subject neighborhood and has appraised residential land in the subject market area on a number of occasions. The appraiser is competent to appraise the subject property.

OWNERSHIP AND SALES HISTORY

A review of county deed records indicates that the subject property is under the ownership of Franklin of Middletown, LLC. The subject last transferred ownership on October 19, 2022, under Deed Book/Page: 9628/328 from K4K, LLC for \$690,476. To the best of the appraiser's knowledge, the property is not currently listed for sale or under contract of sale.

CITY AND NEIGHBORHOOD ANALYSIS

Township of Middletown

Middletown Township is in northeastern Monmouth County. Middletown Township is bordered by the Sandy Hook Bay and the Borough of Atlantic Highlands to the north, Tinton Falls and Colts Neck to the south, the Navesink River to the east and Holmdel, Hazlet and Keansburg to the west.

The Township is 41.08 square miles in size and is most conveniently accessed by the Garden State Parkway and New Jersey State Routes 35 and 36 which run basically north-south and east-west through the municipality. Commercial development in the community is located primarily on these two highways.

Median Value	\$486,230		\$522,171	
Average Value	\$531,489		\$555,664	

The 2022 population estimate for Middletown is 66,764, representing just a very modest decline since 2020. Population is expected to remain stable over the next five years. The 2022 median household income is \$129,677. Income level is expected to grow an additional 9.73% over the next five years, reaching \$142,300 in 2027. The 2022 median home value in Middletown was \$486,230, projected to increase to \$522,171 by 2027.

Neighborhood

The property is in western Middletown Township, at the Holmdel border and north of the Lincroft section of Middletown Township. The neighborhood is substantially developed with single family dwellings. Significant land uses include the Memorial Sloan Kettering Cancer Center at the Garden State Parkway, Bell Works, Tatum Park and Holmdel Park. Commercial uses are located on Route 35 to the east and in Lincroft to the south.

Analysis

In terms of the neighborhood life-stage, the neighborhood is in a period of modest growth. The real estate market declined after the Great Recession began in 2007/2008 and was further damaged by Superstorm Sandy. However, the market began to improve in 2012 and accelerated in 2020 as the result of the COVID-19 pandemic. We expect modest growth in the foreseeable future.

DESCRIPTION OF THE APPRAISED PROPERTY

Site Description

Use: Vacant Land.

Location: North side of West Nut Swamp Road between the Garden State Parkway and Crawford's Corner - Everett Road in the Township of Middletown, Monmouth County, New Jersey.

Size: 18.71± acres or 815,152± square feet total, based on subdivision map.

Frontage: 1,121± feet on West Nut Swamp Road

Shape: Irregular

Topography: Generally level, at road grade.

Access: None, subject is vacant land

Utilities: Public Utilities are available.

Infrastructure: West Nut Swamp Road is a two-lane local road

Encroachments: None noted, but no survey was provided

Easements: None noted

Wetlands: Please refer to the Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023 above.

Flood Zone: The subject parcel appears to be located primarily in the "X" flood zone, flood Insurance Rate Map Community panel number 34025C0157F effective September 25, 2009 shown below.

Environmental Impairments: None noted

Underground Storage Tank(s): None noted

Tax Map

Flood Map

Improvement Description

The subject is vacant land.

Assessments and Taxes

The 2023 aggregate tax assessment for the subject is summarized as follows:

Land	\$943,100
Improvement	\$ <u>0</u>
Total	\$943,100

The 2022 tax rate in Middletown was \$1.883/\$100 of valuation. The tax rate for 2023 has yet to be established. The 2022 ratio of market value to assessed value in Middletown is 100%.

Zoning

The subject parcels are located in the R45, Low Density, Single-Family Residence zone.

Permitted Uses

Cabana, commercial woodland, cropland, fisheries, livestock, pasture and rangeland, nursery, orchard and vineyard, government office and facility, athletic fields, basketball court (public), nature area, reservation, park, playground, swimming pool (commercial), tennis court (commercial), mother and daughter dwelling, single family detached, commuter parking lot, highway and street right-of-way, railroad right-of-way, electric, gas, water and sewer line, utility equipment building. Please see the Addenda of report for the full listing of permitted uses and ordinance.

Bulk Requirements

Minimum Lot Area: 45,000 square feet interior, 48,375 square feet corner

Minimum Lot Frontage: 200 feet interior

Buildable Lot Area: 30,000 square feet

Yard Requirements

Front Yard Setback: 50 feet

Side Yard Setback: 25 feet

Rear Yard Setback: 50 feet

Maximum Height: 2.5 Stories

Subject Conformity to Zone

The subject parcel appears to be conforming in bulk and yard requirements and is of adequate size for a four-lot residential subdivision with five open space or stormwater management lots per a Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023.

HIGHEST AND BEST USE

The reasonably probable use of property that results in the highest value. The four criteria that the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity.

Source: The Dictionary of Real Estate Appraisal, 7th Edition, Appraisal Institute, Copyright 2022

Highest and Best Use is an essential analysis in the development of an appraisal and makes up the basis upon which all conclusions in the appraisal are based. Highest and Best Use is a two-part process in which the property is analyzed *As Vacant* and *As Improved*. These studies are developed by addressing the four criteria mentioned above. Through this process, a conclusion is reached about the use that would bring the greatest value to the land as of the date of appraisal.

As Vacant

Physically Possible: An analysis of the subject parcel indicates that neither its size, nor its shape, nor its terrain precludes development of the site.

Legally Permissible: A review of the zoning requirements for the R45 zone indicates that residential uses are permitted, and the subject site is conforming and is of adequate size for a conforming four-lot subdivision, per the Build Out Analysis by T&M Associates dated January 9, 2023 and updated on October 24, 2023.

Financially Feasible: The subject neighborhood is primarily developed with residential uses. Based on recent sales activity, there is demand for residential properties.

Maximally Productive: It is the appraiser's opinion that the maximally productive use of the subject is a four-lot residential subdivision with five open space or stormwater management lots.

APPRAISAL PROCESS

In order to estimate market value, the appraiser has considered the three generally accepted approaches to value. These are the Cost, Market or Sales Comparison, and Income Approaches. Information for these three approaches is extracted from the market and is primarily based on the Principle of Substitution. The Principle of Substitution holds that when two or more commodities or services with substantially the same utility are available, the one with the lowest prices receives the greatest demand and widest distribution.

Cost Approach

The Cost Approach begins with the valuation of the underlying land using a variety of techniques including sales comparison, extraction, allocation, direct capitalization using the land residual technique, direct capitalization using ground rent capitalization, and yield capitalization using a discounted cash flow analysis, also called subdivision development analysis. To the land value estimate the depreciated value of the replacement or reproduction cost of the improvements is added. This approach is most appropriate when improvements are relatively new, have little depreciation and represent highest and best use or when the improvements are very old and contribute little to value. The Cost Approach is also effective for special purpose-type improvements.

Sales Comparison Approach

The Sales Comparison Approach is often used to estimate the value of vacant land and improved properties. This approach produces value indications for the subject through comparison of similar properties referred to as comparable sales. In the search for comparable sales, the appraiser typically focuses on such issues as highest and best use, conditions of sale, date of transaction, location, physical characteristics and income data. In the analysis of comparable sales, a single common denominator most representative of the market, called the unit of comparison, is sought, although more than one may be present. The Sales Comparison Approach is most effective in indicating market value when an adequate number of comparable properties have, in fact, been sold.

Income Capitalization Approach

The Income Approach measures the present value and future benefits of property ownership and is primarily based on anticipation. The approach requires extensive market research to determine a property's potential gross income by analyzing contract and market lease data, as well as market vacancy and expenses, in order to estimate net operating income. The anticipated net income produced before payment of debt is then capitalized at a rate which considers financing characteristics prevailing as well as risk factors and acceptable rate of return for real estate investors. The capitalization of net operating income, using the direct capitalization or discounted cash flow analysis methods, produces the value indication.

Reconciliation and Final Value Estimate

The final step in the appraisal process is the reconciliation of the value indications. The reliability of each approach, in terms of quantity and quality of the data and the appropriateness to the nature of the property are considered in the final selection of value. If a substantial range in value is indicated by the approaches, it may be indicative of the appropriateness in the assignment of that respective approach. The appraisal process must consider and give weight to the approach or approaches deemed most appropriate and reflective of buyers' and sellers' actions in the marketplace.

Applicable Approaches

This report is a market value appraisal, and each of the three approaches to value was considered. The Sales Comparison Approach is considered the most applicable approach to value vacant land and is developed in this report.

SALES COMPARISON APPROACH

The Sales Comparison Approach is an appraisal procedure in which the market value of a property is estimated by direct comparison and analysis of the sales of similar substitute properties.

The basic steps implemented in the application of this approach are as follows:

1. Conduct a market investigation to locate comparable property sales and offerings and gather relevant data concerning each comparable, focusing on such issues as highest and best use, conditions of sale, date of transaction, location, physical characteristics and income and expense data;
2. Verify the terms and conditions as well as motivating forces of each of the sales through verification of deed data and/or communicating with principals of the transaction or their legal representatives;
3. Analyze each of the comparable sales' significant characteristics and relate those to the subject property;
4. Identify the most significant and consistent comparative unit and adjust for dissimilarities between the comparable properties and the subject, or develop appropriate ratios to respective sale prices;
5. Formulate an estimate of the market value of the subject based on these comparisons.

In the application of this approach the appraiser employs the principles of supply and demand, balance, substitution and externalities as the market should directly indicate the prices paid for similar properties at a particular point in time. The direct sales activity and offerings assist in the determination of the balance present within the market, as one property may be a suitable substitute for another to a prospective purchaser. External forces generally of a neighborhood environmental nature may be present in the comparables; therefore, sales in close proximity to one another are desirable in order to mitigate dissimilar influences.

Sales Investigation

The appraiser conducted a search of land sales for residential subdivisions in the subject market area. Several Land Sales were identified, and five Land Sales were selected for direct comparison. These Land Sales are described and analyzed in the following pages:

Land Sale 1

Property Identification

Remarks

Sale of a 4.4+/- acre parcel in Manalapan located in the R40, Single-Family Residential zone. Sold with approvals for a four (4) lot subdivision. There is an older dwelling on one of the lots which is a tear-down. The sale price has been adjusted to account for the cost of demolition. Approvals received in 2016, with extensions. Resolution PFM0209A dated 10/13/2016, memorialized 11/10/2016.

Land Sale 4

Property Identification

Sale Price/Planned Unit	\$133,333
Sale Price/Front Foot	\$1,508

Remarks

Arm's length sale of an 18.97+/- acre parcel of land located in the R-80, Residential zone. Subject received preliminary approvals in 2008, with a one-year extension granted in 2014 for subdivision into 10 lots, 9 residential and one detention basin. Extension expired in 2015. Both listing and selling agents stated the buyer intends on pursuing these approvals and that they have begun due diligence. However, per the planning board, final approvals were never received and as of the sale date, no new applications have been made to the Township.

Sale Price/Front Foot	\$966

Remarks

Sale of five approved single family lots ranging from 1.550 to 3.282 acres in size. Approvals were based on the cluster option in the LC, Land Conservation zone which requires five acre lots. Lot 17.06 making up the rear of the parcel is 13.91 acres in size and was dedicated to the Township of Marlboro for conservation purposes. Lot use existing Reids Hill Road frontage except Lot 17.05 which is access by a 12 foot wide gravel driveway. Subdivision map filed December 10, 2018 Case Number 320-2. Per the broker, the property was on the market for three years, with a \$1,500,000 initial listing price. Received two offers before closing with Suncrest Builders.

Land Sale Map

Unit of Comparison

To compare the Land Sales to the subject, the selection of an appropriate unit of comparison is necessary. Typically, the unit of comparison for vacant land is either sale price per square foot or sale price per acre, although sale price lot, sale price per front foot and sale price per square foot of proposed or approved floor area are sometimes used. These units of comparison are developed on the land sale comparable data sheets. The *Per Market Lot* unit of comparison is the most appropriate because it is consistent with the way buyers (developers) analyze land for potential purchase.

Discussion of Adjustments

The Land Sales were adjusted for several differences, as shown on the sale adjustment grid below. Adjustments were first made for property rights conveyed, financing, conditions of sale and market (time). Additional adjustments were made to the comparables based upon location, zoning and lot size.

Property Rights Conveyed: All of the sales were conveyed in fee simple, and no adjustment is required.

Financing: None of the sales involved non-market financing that would have impacted value; therefore, no adjustments were applied.

Conditions of Sale: All sales are arm's length; no adjustments are required.

Market Conditions (Time): The sales took place between 2020 and 2022. Market Condition (Time) adjustments are based on information obtained from the Monmouth/Ocean County Multiple Listing Service, shown below:

Middletown Residential Sale Price Trend			
Year	Median Sale Price	Number of Sales	Percent Change
2019	\$420,000	763	
2020	\$504,500	940	20.1%
2021	\$550,000	859	9.0%
2022	\$600,000	702	9.1%
YTD 11/2023	\$630,000	477	5.0%
Percent Change			50.0%
Number of Years			4
Percent Change per Year			12.5%
Concluded Annual Change			10.0%

Source: Monmouth Ocean Regional MLS

The Land Sales are adjusted at 10% per year.

Location: The subject is in western Middletown Township on the Holmdel Township border. Land Sale 2 is in Holmdel Township, which is a generally higher value community. This Land Sale is adjusted downward. The remaining Land Sales are considered similar overall and are not adjusted.

Zoning/Approvals: The subject does not have subdivision approvals. Land Sales 1, 2 and 4 are similar and are not adjusted. Land Sales 3 and 5 sold with approvals, which is superior to the subject. These Land Sales are adjusted sharply downwards to reflect the cost, time and risk associated with obtaining subdivision approvals in the State of New Jersey.

Lot Size: Per the requirements of the R-45 zone, the minimum lot size is 45,000 square feet. All the Land Sales are considered similar overall and are not adjusted.

Project Size: The *theory of economy of scale* implies that smaller projects tend to reflect higher per unit values and conversely, larger projects tend to reflect lower unit values, when all other variables are equal. The Land Sales are adjusted accordingly.

The Land Sale Adjustment Grid follows:

Land Sale Comparable Adjustment Grid

Subject Lots	4					
Indicated Value	\$760,000					

Value Estimate

After adjustment, the Land Sales were weighted. Land Sale 1 is given the most weight because it is the sale of the subject, and it required little adjustment. The concluded value is \$190,000 per lot rounded, or \$760,000 based on a four lot subdivision.

Indicated Value, Sales Comparison Approach.....\$760,000

**Franklin at Middletown, LLC
1114 West Nut Swamp Road, Middletown, NJ**

RECONCILIATION AND FINAL VALUE ESTIMATE

The subject of this report is three lots totaling 18.71+ acres of vacant land situated on the north side of West Nut Swamp Road between the Garden State Parkway and Crawfords Corner - Everett Road in Middletown, New Jersey. The parcels are more particularly known as Block 1045, Lots 2, 3 and 4 in the Township of Middletown, Monmouth County, New Jersey. The subject is located in the R-45, Low Density, Single-Family Residence zone and permits residential development. The Highest and Best Use was determined to be a four-lot residential subdivision with five open space or stormwater management lots per a Build Out Analysis prepared by T&M Associates dated January 9, 2023 and updated on October 24, 2023. The purpose of this appraisal is to estimate the fee simple market value for a potential full acquisition.

The Sales Comparison Approach is the most appropriate method to value the subject. The fee simple market value of the subject was \$760,000.

Based on the analysis and conclusions contained in this appraisal report, we estimate the fee simple market value of the subject as of November 3, 2023, to be:

SEVEN HUNDRED SIXTY THOUSAND DOLLARS

\$760,000

EXPOSURE PERIOD

Exposure Time is defined as the estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based upon analysis of past events assuming a competitive and open market.

Exposure time is always presumed to occur prior to the effective date of the appraisal. The overall concept of reasonable exposure encompasses not only adequate, sufficient and reasonable time but also adequate, sufficient and reasonable effort.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Estimated Exposure Time

Exposure time for the subject is estimated to be six months to one year.

This estimate assumes:

1. That the subject property was listed with a competent broker experienced with similar type properties;
2. That the subject was offered for sale at no more than 110% of the appraised value.

CERTIFICATION

I certify that to the best of my knowledge and belief:

- the statements of fact contained in this report are true and correct;
- the reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions and conclusions;
- I have no present or prospective interest in the property that is the subject of this report, and I have no personal interest with respect to the parties involved;
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment;
- my engagement in this assignment was not contingent upon developing or reporting predetermined results;
- my compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal;
- the reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Code of Professional Ethics and the Standards of Professional Appraisal Practice of the Appraisal Institute, which include the Uniform Standards of Professional Appraisal Practice ("USPAP");
- I have performed appraisal services regarding the subject of this report within the three-year period immediately preceding acceptance of this assignment;
- I made a personal inspection of the property that is the subject of this report;
- No one provided significant real property appraisal assistance to the person signing this report;
- I am certified as a General Property Appraiser by the State of New Jersey;
- as of the date of the report, I have completed the continuing education requirements of the State of New Jersey and of the Appraisal Institute;
- the use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

Date

DEFINITIONS

Market Value

The most probable price that a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- Buyer and seller are typically motivated;
- Both parties are well informed or well advised, and acting in what they consider their best interests;
- A reasonable time is allowed for exposure in the open market;
- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Fee Simple Estate

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Leased Fee Interest

The ownership interest held by the lessor, which includes the right to receive the contract rent specified in the lease plus the reversionary right when the lease expires.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Extraordinary Assumption

An assignment-specific assumption as of the effective date regarding uncertain information used in an analysis which, if found to be false, could alter the appraiser's opinions or conclusions.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Comment: Uncertain information might include physical, legal, or economic characteristics of the subject property, or conditions external to the property, such as market conditions or trends, or about the integrity of data used in an analysis. (USPAP, 2020-2021 ed.).

Hypothetical Condition

A condition, directly related to a specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results but is used for the purpose of analysis.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Comment: Hypothetical conditions are contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in an analysis. (USPAP, 2020-2021 ed.)

Jurisdictional Exception

An assignment condition established by applicable law or regulation, which precludes an appraiser from complying with a part of USPAP.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

Easement

The right to use another's land for a stated purpose.

Source: *The Dictionary of Real Estate Appraisal*, 7th Edition, Appraisal Institute, Copyright 2022

ASSUMPTIONS AND LIMITING CONDITIONS

This appraisal report is subject to the following assumptions and limiting conditions:

1. The information furnished by others is believed to be reliable, but no warranty is given for its accuracy.
2. No responsibility is assumed for the legal description provided or for matters pertaining to legal or title considerations. Title to the property is assumed to be good and marketable unless otherwise stated.
3. No responsibility for legal matters is assumed. All existing liens, mortgages or other encumbrances are disregarded, and the property is appraised as though free and clear.
4. Unless otherwise stated, it is assumed that the use of the land and improvements is confined within the boundaries or property lines of the property described and that there is no encroachment or trespass unless noted in the report.
5. All engineering materials are assumed to be correct. The plot plans and other illustrative material in this report are included only to help the reader visualize the property.
6. All sketches in this report are intended to be visual aids and should not be construed as surveys, engineering reports or architectural plans.
7. If no legal description or survey was furnished the appraiser may use the municipal tax map to ascertain the physical dimensions and acreage of the property. Should a survey prove this information to be inaccurate, it may be necessary for this appraisal to be adjusted.
8. Responsible ownership and competent property management are assumed.
9. It is assumed that the property is in full compliance with all applicable federal, state, and local environmental regulations and laws.
10. It is assumed that the property conforms to all applicable zoning and use regulations and restrictions unless a nonconformity has been identified, described, and considered in the appraisal report.
11. It is assumed that all required licenses, permits, certificates of occupancy, consents, and other legislative or administrative authority from any local, state, or national government or private entity or organization have been or can be obtained or renewed for any use on which the opinion of value contained in this report is based.
12. It is assumed that there are no hidden or unapparent conditions of the property, subsoil, or structures that render it more or less valuable. No responsibility is assumed for such conditions or for obtaining the engineering studies that may be required to discover them.

13. The appraisal inspection is not a structural examination, termite or infestation investigation, environmental examination or an analysis or certification of mechanical equipment or building components. These types of investigations can only be performed by experts in their specific fields. We assume no responsibility as to the condition or existence of these elements.
14. Unless otherwise stated, the appraiser has no knowledge of the existence of hazardous materials on or in the property. The presence of substances including, but not limited to, petroleum or petroleum byproducts, radon, asbestos, urea-formaldehyde foam insulation or other potentially hazardous materials may affect the value of the property. The value estimated is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for such conditions or for any expertise or engineering knowledge required to discover them. The intended user is urged to retain an expert in this field, as needed.
15. We are not experts in the Americans with Disabilities Act (“ADA”), and we assume no responsibility for non-compliance with the ADA. The intended user is urged to retain an expert in this field, as needed.
16. Any proposed improvements are assumed to have been completed unless otherwise stipulated, so any construction is assumed to conform to the building plans referenced in the report.
17. Unless stated otherwise, the opinion of value is limited to the land and the improvements only. The value of intellectual property, good will/going concern and furniture, fixtures and equipment are not included in the value of the real estate.
18. Any allocation of the total value estimated in this report between the land and the improvements applies only under the stated program of utilization. The separate values allocated to the land and buildings must not be used in conjunction with any other appraisal and are invalid if so used.
19. Any opinions of value provided in the report apply to the entire property, and any proration or division of the total into fractional interests will invalidate the opinion of value, unless such proration or division of interests has been set forth in the report.
20. Any forecasts, projections, or operating estimates contained herein are based on current market conditions, anticipated short-term supply and demand factors, and a continued stable economy. These forecasts are, therefore, subject to changes with future conditions.
21. The appraiser assumes that the reader or user of this report has been provided with copies of available surveys, site plans, building plans, rent rolls and any leases that encumber the property.

22. Disclosure of the contents of this appraisal report is governed by the Code of Professional Ethics of the Appraisal Institute which include the Uniform Standards of Professional Appraisal Practice (“USPAP”).
23. Possession of this report, or a copy thereof, does not carry with it the right of publication or use. The report, a copy of the report, or any portion of the report may not be used for any purpose or by any person or entity other than the party to which it is addressed without the express written consent of the appraiser.
24. The appraiser is not required to give further consultation or testimony or to be in attendance in court with reference to the property in question unless prior arrangements have been made.

PLANNING AND DEVELOPMENT REGULATIONS

NOTES:

Schedule of Area, Yard and Building Requirements, Single-Family Residential Zones

- (A) Lot coverage for principal and accessory structures.
- (B) Lot coverage for all improvements (impervious or pervious) including all parking areas and automobile access driveways and internal roadways, whether covered by an impervious or pervious material, patios associated with an in-ground or aboveground swimming pool, surface area of an in-ground or aboveground swimming pool above 800 square feet [Ord. No. 2005-2815], and all other impervious surfaces.
- (C) FAR can be increased by 2% if the front setback provided is at least 150% of the minimum required.
- (D) FAR can be increased by 2% if the front setback provided is at least twice the minimum required.
- (E) See special R-15 zoning requirements for preexisting nonconforming lots.
- (F) Permitted building coverage may be increased by 30% where two or more adjoining lots establish shared parking and access arrangements; each lot shall be permitted the increased building coverage.
- (G) The maximum percent of lot coverage for a detached single-family dwelling which is either a nonconforming use or structure may be increased, provided the resultant lot coverage complies with the coverage limits in the most restrictive single-family residence zone to which the area of the undersized lot conforms. In no case shall coverage exceed 35%.
- (H) Or the average of the existing front setbacks for the two adjoining lots. [Ord. No. 2003-2744]

- (M) FAR shall not apply to lots existing at the time of the adoption of this ordinance that are less than 40,000 square feet. [Ord. No. 2005-2825]
- (N) Where the maximum gross floor area permitted exceeds the permitted floor area ratio, the floor area ratio shall govern. [Ord. No. 2009-2879]
- (O) Minimum circle diameter may be reduced 40% for lots predominantly fronting a cul-de-sac built. [Ord. No. 2007-2916]
- (P) Minimum circle diameter does not apply to existing detached single-family dwellings or to lots established as part of a performance residential or cluster development. [Ord. No. 2007-2916]
- (Q) (1) Maximum building height on lots 100 feet wide or less measured at the street line shall be 28 feet. Building height may increase one foot for every five feet of lot width above 100 feet, but in no case shall exceed 35 feet.
- (2) In special flood hazard areas, height of buildings located on lots 125 feet wide or less may be increased to 35 feet as measured from one foot above base flood elevation if: (a) the area below the base flood elevation contains no physical enclosures; (b) the vertical distance from predevelopment grade to the roof peak does not exceed 40 feet; and (c) a nonconversion agreement is recorded with the Monmouth County Recording Officer. [Ord. No. 2012-3073]
